DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Swales et al.

Swales et al disclose an adaptive antenna system comprising: a plurality of antenna elements (figure 13) that form a plurality of beams; means (source estimation processor) for detecting a communication amount of data transmitted or received by each of the beams; and controlling means (beamformer) for controlling a direction and width (figure 12) of each of the beams corresponding to the detected communication amount. The elements recited above teach claims 1-22 when taken in light of the text of the article.

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 703 306 4155.
